

Problem Set 3

Bowei Dong

6.1

How big was the insurance .csv file (once uncompressed)? (i.e. what was the output in 3(e)?)

The size of the file is 5MB according to the output.

6.2

How many lines did the CSV file have before doing the end-of-line (EOL) conversion? (see 3(g))

Before doing the end-of-line (EOL), the number of lines is 0.

6.3

How many lines did the CSV file have after doing the EOL conversion?

According to the output, the number of lines is 36634.
